**130MPH**  
wind resistance

Let those winds howl. Because of our innovative HP42® shingle technology, your roof is shielded from wind gusts up to 130 mph.

**HP42®**  
technology

HP42® technology features a wide format for better curb appeal, plus our Sweet Spot™ nailing area and double FASTAC® sealant line ensure your shingles will stay put.

**Scotchgard™**  
shingle protector

Your roof will stay beautiful because it features Scotchgard™ Protector by 3M™, which resists black streaks and stains caused by algae.

**3M COOLING**  
technology

Controlling the power of the sun with 3M™ reflective granules, which will keep your roof and home up to 20° cooler, helping to reduce your energy expenses.

**3M SMOG**  
reducing technology

Inspired by the power of trees, your roof can help combat air pollution with 3M™ Smog-Reducing Granules.

The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere. Roofing material surfaces with a higher SRI will be cooler than surfaces with a lower SRI under the same solar energy exposure, especially on a sunny day. Using materials with higher SRI values can enhance building occupant comfort and reduce air conditioning use. For more information, please reference the Cool Roof Rating Council: <https://coolroofs.org/>

To provide homeowners the most accurate representation of color options, several photo scans and house shots were utilized in numerous lighting conditions. Variations in lighting illustrate the color gradients on asphalt shingle roofs.

Color blends vary from shingle to shingle. Before installation, consult with your contractor and request to view the actual shingles being installed on your roof to ensure confidence in your final color selection.
